THE ~~CROSSROADS~~ DETOUR OF AMERICA... THANKS TO GOV. MIKE PENCE

Thanks to years of neglect, Hoosier roads and bridges have fallen into dangerous disrepair and the results haven't been pretty: road closures, bridge failures, miles-long sections of major highways rendered impassible.

Yet Gov. Pence chooses to play political games rather than restoring the Crossroads of America to safety.

Gov. Pence is choosing to fund just a tiny amount of Indiana's transportation needs — even though studies show that 98% of our roads and bridges are inadequately funded¹ and 2,000 bridges in the state have been judged structurally unsound.²
